DIVA ARKSUN DEMOBANK

Thank you for downloading this selection of Arksun professional presets created for U-He Diva VSTi/AU soft synth. This demobank is a sampler of the full 128 sound Diva soundbank which is available to buy at <http://www.arksun-sound.com>

Requirements

You will need at least version 1.1 of Diva to be able to use these sounds as intended.

Installation

Unzip the 'Diva Arksun Soundbank' folder into your Diva presets folder and they should show up automatically the next time you start Diva. The default positions of these folders were decided upon installation of Diva, more detailed instructions of installation as of version 1.1 are specified in the user manual on the U-He website:

<http://www.u-he.com/cms/diva>

Soundbank Info

The Diva Arksun Demobank gives but a small taster of what the full commercial bank has to offer. Geared mainly towards EDM and chillout/filmscore music. You'll find everything from aggressive stadium leads to soft ice cool tones, contemporary electronic buzzes to guitars.

Mod Wheel and aftertouch assigned where appropriate, any additional information will be in the information panel for each specific preset.

Most of the presets will sound their best in Divine quality mode, with a few exceptions which are given in the individual preset info panel. There may be cases where the filter sounds brighter in fast or draft mode and that might be preferable, there's no right or wrong way here, experiment and see! (but make sure the render mode is set to 'same' if you want it to sound at a quality setting other than Divine.

Additional

You are free to use these presets musically in any way you see fit and use them in commercial music releases.

You may not however distribute this soundbank (or any part of the soundbank) in any shape or form. Also this soundbank may not be made part of a product for which a fee is charged.
