

Thank you for downloading Dream maker Free Demo, 12 presets for Diva.

You are now in possession of a little piece of patches centered around the dreams of the past.

sorry for my english, I'm french, I hope you understand the outline!

So, i tried to bring the feeling of a fleeting melancholy; and even several styles coexist, they are bound by the dream.

I've created All sound in fast mode.

If the sounds are not classified, it is because they are for the most leads and all sounds can be stored in all categories. However, I have indicated the possible categories for each sound and a second file with the sounds classified is proposed.

if you have any questions, want to respond about the product or buy it, I invite you to go to this address: <http://eyeln-sound.blogspot.fr/>

Installation :

Copy/Paste the Dream maker folder into you diva presets directory.
