

**mc Hive 128 User Notes:**

**Two folders contain the following.**

- 1. "mc Hive no fx" folder contains 128 sounds where no effects are used, and there is only EQ, Compression, and a few with Distortion where these are used for tonal balancing only.**
- 2. "mc Hive fx" folder contains the same 128 sounds where effects are used. This may or may not include Delay, Reverb, Chorus, Phase and Distortion effects. Note that all effects that are off, were individually pre-adjusted to taste.**

**All sounds have Mod Wheel settings.**

**About 95% of sounds use After Touch settings.**

**About 20% of sounds use Pitch Wheel settings for alternate assignments that are not pitch bend related.**

**I hope you enjoy these sounds.**

**Regards,**

**Michael**
