# Introduction

# 4

New Loops presents Wavetable – 120 new presets for U-he Hive. In the 1.2 update of Hive, U-he introduced wavetable oscillators which opened Hive up to a whole world of new sound possibilities.

You'll find 50 hard and dirty basses, 16 deep and cinematic pads, 14 digital synth leads, 12 punchy plucks, 11 keys and synths, 11 sequences and arps, and 6 sound effects.

Each preset is fully tagged and uses the mod wheel with many morphing the preset into completely different sounds.

Whether you're making heavy dubstep and trap, or cinematic electronica, you'll sure to find plenty of inspiration in these presets.

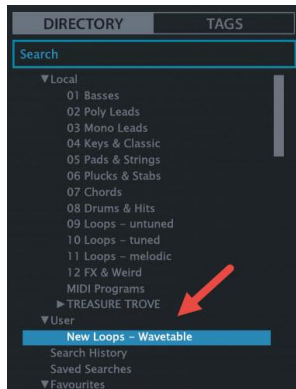

# Installation

5

Installing this sound pack is easy. Simply download the Zip file and unpack. You can then move the entire folder to your preferred place on your hard disk. Please keep a backup copy of your sound pack.

To install the presets in HIVE, first open Hive's Preset browser and Right-click on "User" from the list on the left (as shown), then select reveal in Finder (Mac) or open in Explorer (Win). This will open the user presets folder. This is the folder you should add this sound bank too. See the Hive user guide for full details. From the browser, click New Loops – Wavetable to show all presets in this sound bank.

**Please note:** This sound bank requires U-he HIVE version 1.2 or later and will not work with earlier versions.

# New Loops

## 6

New Loops is an English sound design label publishing audio sample packs and synthesiser presets in the pro audio market. With a focus on quality and usability, New Loops sounds are used by DJs, producers, music studios, and composers all over the world.
