Thank you for downloading this selection of Arksun professional presets created for U-He Zebra VSTi/AU soft synth. This demobank is a sampler of the full 128 sound Zebra soundbank which is available to buy at
www.arksun-sound.com

Requirements

You will need at least version 2.3 of Zebra to be able to use these sounds.

Installation

Unzip the Zebra Arksun Demobank folder into your Zebra presets folder and they should show up the next time you start Zebra. The default positions of these folders as of version 2.3 are:

Preset folders Mac

There are two different preset locations:

Global
MacintoshHD/Library/Audio/Presets/u-he/Zebra2/

User
~user/Library/Audio/Presets/u-he/Zebra2/

Preset folders PC
C:\program files\u-he\Presets\Zebra2\

This may change in future version, please check the www.u-he.com website for further details.

Soundbank Info

The Zebra Arksun Demobank gives but a small taster of what the full commercial bank has to offer, from soaring trance leads to soft romantic keyboards to sinister haunting bells in the far distance or even the sound of an old steam train!.

To further enhance these sounds, all of the presets make use of all 4 XY Performance pads, arranged thus:

XY PAD 1: Filter
XY PAD 2: Waveshaping (from subtle changes to a totally different sound!)
XY PAD 3: Other (reserved for things not in the other categories)
XY PAD 4: FX (Delay, Reverb etc)

Double Clicking them returns them to the center position which is also the default position for the sound.

Additional

You are free to use these presets musically in any way you see fit and use them in commercial music releases.

You may not however distribute this soundbank (or any part of the soundbank) in any shape or form. Also this soundbank may not be made part of a product for which a fee is charged.

For further information on Arksun Soundbanks:
