

# ONE

THANK YOU FOR DOWNLOADING THE ONE DEMO FOR HIVE  
To purchase the full version of ONE, please visit at [monomosound.com](http://monomosound.com)

The ONE demo contains 20 sounds for the U-he Hive synthesizer.  
The full version of ONE contains 150 sounds.

The demo includes one folder labeled **ONE Hive demo** with 20 sounds.

The **full version** contains both a **ONE wet** and **ONE dry** folder.

Each contain the original 150 sounds.

The **ONE wet** folder makes use of all effects such as Delay and/or Chorus.

The **ONE dry** folder has all main effects (reverb, delay, chorus) **off** by default.

The **ONE dry** folder still makes use of EQ, Compression, and Distortion modules.

**Important:** **ONE** has special suggestions noted in the **info panel** of each sound.

Most of these include extra OSC's, Filters, or SUB Oscillators turned **off** by default that are preset for creating tonal changes to the original tone, once activated.

There are also other types of suggestions noted, such as Envelope settings, and Filter type settings to try out as well.

These suggestions will either alter the sound slightly, while others will cause a greater change within the sound.

## • Installation Instructions •

Place the **ONE Hive demo** folder inside one of these locations.

Windows: > \VstPlugins\u-he\Hive.data\Presets\Hive

Mac OSX: > MacHD/Library/Audio/Presets/u-he/Hive
