About Kinesis

Thank you for purchasing the Kinesis soundsset for Hive 2. We hope you will enjoy these sounds and put them to good use in your music!

Bryan Lake aka Sound Author presents a 128-patch set focussed on timbral movement. Kinesis comprises an arsenal of organic grooves, snappy generative arpeggios, evolving sequences and lush ambient pads, several of which employ Hive's special filter modes.

Most of the presets react to MIDI velocity, modulation wheel and pitch bend.

All presets include XY pad control, which not only appears in Hive's XY panel, but also in Hive's preset browser (as a row of 8 knobs) as well as on NKS hardware.

Installation

Standard Method

Drag & drop the *Hive 2 Kinesis.uhe-soundsset* file into Hive (anywhere should work). The soundsset will appear in the 'User' folder. If a soundsset with the same name already exists there, any modified files will be backed up and the location will be displayed.

Alternative Method

If the above method doesn't work, click on the u-he badge, select *Install Soundsset...* from the menu, navigate to the *Hive 2 Kinesis.uhe-soundsset* and open the file. This method is especially useful for Linux users, as that version of Hive does not support drag & drop.

NKS

Kinesis is NKS-ready, including audio previews for all its presets. After installing Kinesis, please rescan the presets in your NKS host: Go to *Preferences / Library / Factory*, select "Hive Factory" and click on the [Rescan] button.

Presets

1 Seq - Melodic

Bioluminescence	Paper Tiger
Black Rainbow	Progressions
Bouncy Plux	Pulsating Plux
Bubbly Chords (maj)	Resolved Mysteries (maj)
Bubbly Chords (min)	Resolved Mysteries (min)
