KLING KLONG

HIVE 2 PERCUSSION

Heckmann Audio GmbH · Berlin

Kling Klong

Thank you for purchasing Kling Klong for Hive 2. We hope that you enjoy these sounds and use them to spice up your music for many years to come!

The Instruments

Kling Klong is a collection of 172 percussive hits and loops which Hive's XY pads can turn into a practically limitless supply of rhythmic material suitable for a variety of genres. All four XY pads have been carefully assigned to multiple parameters in all presets.

You should see the pads not simply as macros for tweaking the sounds to taste, but also as **realtime performance** controls alongside *mod wheel*, *pitch bend* and *aftertouch* (MW, PB and AT in the browser's USAGE field). We therefore recommend MIDI-controlling the eight individual knobs in the XY panel. For details about MIDI control, please refer to the *Hive 2 User Guide*, specifically the *Configuration* chapter.

XY pad 1 offsets Control A and Control B in all presets. The handle is always located at the bottom left, and the controls are rectified with the *unipolarize* option.

Below the main preset folders *Mono Loops*, *Poly Loops*, *Fantasy Hits* and *Reality Hits* is another folder containing *XY Variants*, examples of XY pad tweaks. For examples of XY **performance** you can watch our [YouTube videos](#).

The Author

Howard Scarr has been obsessed with synthesizers ever since 1973 when he co-founded the UK's first all-synth band, Zorch. You can hear many of his synth sounds in the scores to *The Dark Knight*, *Inception*, *Dunkirk*, *Blade Runner 2049* and *Dune*, to name just a few.

Installation

Standard Method

To install, drag & drop the *.uhe-soundset* file into Hive 2 (anywhere will do). The soundset will appear in the *User* folder. If a soundset with the same name already exists there, any modified files will be automatically backed up and the location displayed.

Alternative Method

Soundsets in *.uhe-soundset* format can be installed by clicking the u-he badge, selecting *Install Soundset...* and navigating to the desired file. This option is especially useful for Linux users, as the Hive version for that operating system does not support drag & drop.

1 Mono Loops

| | | |
|--------------------------|--------------------------|--------------------------|
| A Funky Drum 1 - tight | Framed Again 2 - fast | Punch Bags 1 - straight |
| A Funky Drum 2 - ringer | Flatbread | Punch Bags 2 - skipper |
| Asap Shuffle | Flex Knox 1 - high | Purdish Shuffle 1 - slow |
| Assign Time | Flex Knox 2 - low | Purdish Shuffle 2 - fast |
| Baptech | Gated Jumper | Red Tunes 1 - pops |
| Beato Beat | Gravel Clock | Red Tunes 2 - major |
