MONOCHROME

150 PRESETS FOR HIVE 2

Heckmann Audio GmbH · Berlin

Monochrome

Thank you for purchasing Monochrome for Hive 2. We hope that you enjoy these sounds and put them to good use in your music for many years to come!

The Author

Monochrome by Niall McCallum of **ModeAudio*** captures the noisy, washed out and dream-like tones of your favorite Indie Electronica artists. Grainy, warbly, otherworldly...

The focus of the set is the more organic edge of the contemporary electronic music landscape: think sonic warmth, rich spectra & plenty of movement courtesy of every type of modulator Hive 2 has to offer.

Inspired by the likes of *Four Tet*, *Caribou*, *Jon Hopkins*, *Max Cooper* and *Thom Yorke*, the set aims to bring the unmistakably 'live' feel of analogue hardware into the digital domain, taking full advantage of the many chunky waveforms & modelled filter types that make Hive 2 such a powerhouse of a synth.

** ModeAudio is a UK-based team of dedicated sound designers & developers.*

Installation

Standard Method

To install, drag & drop the *.uhe-soundset* file into Hive 2 (anywhere will do). The soundset will appear in the *User* folder. If a soundset with the same name already exists there, any modified files will be automatically backed up and the location displayed.

Alternative Method

Soundsets in *.uhe-soundset* format can be installed by clicking the u-he badge, selecting *Install Soundset...* and navigating to the desired file. This option is especially useful for Linux users, as the Hive version for that operating system does not support drag & drop.

1 Bases		
Ancient History	Foundry	Sands Of Time
Emulsify	Fudge Sundae	Short Ride
Bigfoot	Gutter	Silo
Both Barrels	Jab	Stick In The Mud
Bulldozer	Marine Life	Stutterer
