Blue Flamingo

350 sounds for Repro-5 by KYHON

Repro-5 lovers can step into a kaleidoscopic world with this off-the-wall collection of vintage synthesizer tones, all bursting with colour. Blue Flamingo spans 60 years of psychedelia, with many of the offerings evoking the golden era of the 1970s, but adding a modern edge.

The sounds blend childlike whimsy with psychedelic undertones, perfect for recreating the quirky atmospheres of a bygone era without appearing outdated or cheesy. Whether you're scoring a retro film or chasing that elusive sonic charm, Blue Flamingo will inject a unique vibrancy into your music.

Enjoy!

the u-he team

About the author

KYHON is an avant-garde sound designer and music producer from Tel Aviv who loves to push boundaries. In his own words:

I want to tell a story—or at least evoke a vision—through my sounds and my music. The power to surprise an audience is very important to me, and I'd like to communicate that there is no limit to human imagination.

Performance Control

Most of these presets let you create various effects by applying aftertouch and/or the lefthand controls on your MIDI keyboard. The performance controls used in each preset are listed in the Repro-5 browser's **PRESET INFO** panel with the following abbreviations:

- MW** = modulation wheel
- PB** = pitch bender
- AT** = aftertouch (pressure)
- VEL** = key velocity
- Ctrl A/B** = Control A and B (user-defined: see the Repro-5 user guide)

Blue Flamingo consists of 175 unique presets and 175 variants. Although the numbered alternatives (1, 2, 3 etc.) can sound similar at first, they will react differently to one or more of the performance controls listed above.
