Funk Station

100+ FUNKY SOUNDS
for **Repro-1** and **Repro-5**
by Howard Scarr

Thank you for purchasing the FUNKSTATION soundset for u-he Repro.

Funkstation: Old school sounds inspired by Parliament-Funkadelic, The Gap Band, Midnight Star and the many artists who embraced synthesizers in the Funk music scene of the '70s and '80s. This set includes many a nod to keyboard greats such as Bernie Worrell, Stevie Wonder, George Duke and others who were responsible for discovering and refining the funky side of synthesis.

So you have all the right ingredients: juicy leads, meaty basses, filtery polyphonic stabs and analogue pads... everything you need to create some SERIOUS synth-funk!

We hope you will enjoy playing these sounds, and put them to good use in your music.

Installation

Apart from the separate folders for Repro-1 and Repro-5, FUNKSTATION comes in two different formats: The *Funkstation-1* and *Funkstation-5* folders contain normal *.h2p* files which are recognized in the respective plug-in's browser, while the *Funkstation-1 (NKS)* and *Funkstation-5 (NKS)* folders contain *Native Kontrol Standard* files. If in doubt, please install the regular version only.

Regular versions

You can install FUNKSTATION anywhere within Repro's 'Local' or 'User' (preferred) folders. Here's the best method:

1) Load an instance of Repro-1 and click on the PRESETS button
2) In the 'Directory' panel, right-click on 'User' and select 'reveal in Finder' (Mac) or 'open in Explorer' (PC)
3) Copy the **Funkstation-1** folder into the 'Repro-1' folder you have just revealed
4) Back in Repro-1's own browser, right-click on 'User' again and select 'refresh'
5) Repeat steps 1-4 but with **Repro-5** / **Funkstation-5**

NKS versions

Copy the folder "Funkstation-1 (NKS)" into the following location:

Windows .... (YOUR PLUG-IN PATH) \u-he\Repro-1.data\NKS\Repro-1
macOS .... *MacHD/Library/Application Support/u-he/Repro-1/NKS/Repro-1*

Then copy the folder "Funkstation-5 (NKS)" into the following location:

Windows .... (YOUR PLUG-IN PATH) \u-he\Repro-1.data\NKS\Repro-5\
macOS .... *MacHD/Library/Application Support/u-he/Repro-1/NKS/Repro-5*

Alternatively, select Repro-1 / Repro-5 in your Komplete Kontrol host, right-click on the search result list and select "Find in Explorer/Finder" to open the NKS presets folder.

Performance Control

All FUNKSTATION presets include MIDI performance control, which has been carefully programmed so you can create subtle to dramatic 'morphing' effects using pressure and/or the lefthand controls on your MIDI keyboard.

The performance controls used in each preset are listed (under USAGE) in the Repro browser's PRESET INFO panel. While auditioning presets, please make a habit of checking this information and trying out any/all controls mentioned there.

PB *Pitch Bender*, the centre-sprung wheel (joystick or lever). Although most Funkstation presets use this for pitch control, a few of them apply the control to other parameters.

MW *Modulation Wheel* (MIDI CC 1), the rotary control on the left of most MIDI keyboards (others have a joystick or lever there instead).

BR *Breath* control (MIDI CC 2). Not as important as the modulation wheel, but we recommend that you set up the most convenient knob/slider on your hardware MIDI controller to send CC number 2.

Watch out for this one in the PRESET INFO!

AT *Aftertouch* is often missing in consumer-grade MIDI keyboards. If your keyboard cannot send aftertouch directly, please check whether you can simulate it via knob/slider. Failing that, check whether your host application offers a function to translate regular CC data into channel pressure.

Presets

Funkstation-1

Bernie to the ResQ	Pino Balladeer
Big Bear	Pluckatoo House
Black Cat	Pure and True
Bombon Solo	Rhythm of the One
Disco Slide	Riggly 1
Double Down 1	Riggly 2
Double Down 2	Rip Trip
Driver Lead 1	Rubberfunk Attack
Driver Lead 2	Rubberfunk Octave
